DETAILED ACTION

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on January 2, 2004 has been entered.

Claims 13 and 20 are pending in the instant application. Claims 1-12 and 14-19 were canceled via Paper No. 17.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 13 and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pocock U.S. Patent No. 6,314,577.

Referring to claim 13. Pocock discloses a process of identifying music, comprising:

- a) Providing a communication device to be used by a consumer (abstract and paragraph 0013);

Art Unit: 3625

- b) A service provider providing a music identification device having a database of prerecorded musical works (abstract and sheet 3);
- c) The consumer recording a segment of music that is audible to the consumer in a location remote from the music identification device using said portable communication device (abstract);
- d) The consumer transmitting said recorded musical segment from said communication device into a central processing unit (abstract);
- e) The music identification device analyzing and comparing said musical segment to the database of musical works (abstract);
- f) The music identification device identifying at least one closest match (abstract);
- g) The music identification device generating database information regarding said at least one closest match (abstract); and
- h) The music identification device transmitting the database information regarding said at least one closest match to the consumer (abstract).

Referring to claim 20. Claim 20 is rejected under the same rationale as set forth above in claim 13.
